

MedCom and Elekta to Develop Improved Patient Positioning Management

Press Release

Darmstadt, Germany, March 2009

MedCom GmbH today announced collaboration with Elekta for the joint development of patient position verification management.

MedCom and Elekta have identified product collaboration projects within the Particle Therapy market which will enable the integration of MOSAIQ™ Oncology Information Systems with the VeriSuite System, MedCom's high precision patient position verification system. VeriSuite is a collection of software applications that are used in different scenarios to verify and control the position of a patient on a treatment table or a treatment chair.

"MedCom plans to work with the cutting edge MOSAIQ OIS Software to provide our customers with innovative approaches to high precision patient positioning," says Prof. Dr.-Ing. Georgios Sakas, Managing Director, MedCom GmbH. "The installation in the Inclined Beam treatment room in ProCure's Treatment and Development Center in Bloomington, Indiana/USA and the new ProCure treatment center in Oklahoma City will benefit from the joint development."

"Elekta is looking forward to working closely with MedCom to optimize our customers clinical workflow in managing the challenges associated with patient positioning," says Stewart Pegrum, Global Business Manager for Particle Therapy. "The real-time motion data generated by the VeriSuite System introduces new and exciting options which will advance IMPT approaches, as well as provide consolidated data management solutions for our mutual Particle Therapy customers".

About MedCom

MedCom has been originally founded in 1997 as a spin-off of the Fraunhofer Institute for Computer Graphics (IGD), the world expert R&D Institution for Computer Graphics Technologies. Since 2006 is MedCom an entirely privately owned company. MedCom offers innovative & advanced imaging-based products with emphasis on cancer treatment, interventional & surgical navigation and specialized telemedicine solutions (trauma, military & special forces, rural areas, satellite). As an OEM company MedCom is providing products to a large number of world-wide acting providers of integrated clinical solutions, but also high-end clinics from the research sector. More information is available at the MedCom website (www.medcom-online.de)

About Elekta

Elekta is a human care company pioneering significant innovations and clinical solutions for treating cancer and brain disorders. The company develops sophisticated state of the art tools and treatment planning systems for radiation therapy and radiosurgery, as well as workflow enhancing software systems across the spectrum of cancer care.

Stretching the boundaries of science and technology, providing intelligent and resource-efficient solutions that offer confidence to both healthcare providers and patients, Elekta aims to improve, prolong and even save patient lives, making the future possible today.

Today, Elekta solutions in oncology and neurosurgery are used in over 5,000 hospitals globally,

and every day more than 100,000 patients receive diagnosis, treatment or follow-up with the help of a solution from the Elekta Group.

Elekta employs around 2,500 employees globally. The corporate headquarter is located in Stockholm, Sweden, and the company is listed on the Nordic Exchange under the ticker EKTA. For more information about Elekta, please visit www.elekta.com.
